PERSONAL PROJECTS

College Database Management System

(09/2021 - 11/2021)

- A college management system is an educational modern software created using java and MySQL that enables higher education institutions & colleges to manage online admission, student enrollment, students' attendance, online fees, grades, etc. It can also generate online results, mark sheets, student fee lists, etc. & simplifying the hassles of faculty.

Student Management System

- Student Management System is a website that uses Django in the back end and HTML, CSS, JS, and Bootstrap in the front end. Using this website the HOD (Head of the department) can manage all the details of teachers and students.

To-do List in Django (02/2022 - 02/2022)

- It is a webpage where a user can create their to-do list and the back-end was made with Django.
